

Blockchain focused Venture Capital Firms

Global Venture Capital has seen a dramatic increase in funding over the past several years, certainly for more mature, later stage startups. As Blockchain tech and applications are in early stage, investing in startups typically revolves around a few players with in depth expertise and reach in the Blockchain community. A novel aspect in the financing of the blockchain technology sector are public blockchain protocols, which have become venture investors themselves. With large assets and strong market capitalizations they have become major players for the development of applications and infrastructure on their protocol.
